Could I invoke the Muses to my Aid,
My Genius to awake, and guide my Quil;
Yet Sifters thrice three, let it now be said,
That to your Lovers you repay Good-Will.
Gentle *Minerva* do not now disdain,
Thy abstruse Heavenly Secrets to explain.

March hath xxxi Days.

Be quiet Mars, thou't not in the Campaign,
 In Winter Quarters, Mars will be Mars still;
 The Winter Season can't his Courage tame,
 Nor shall his Valour yet outdo his Skill.
 War is a Trade affords abundant Gain,
 We k now full well, those who endure the Pain.

Here Sol and Mars, from active Parts prepare,
And at each other dart a hateful Square;
Nay Jove and Stilbon too, as hot as they,
Brisk up to Chronus, and bids him to obey.

This shews some Action, Statesmen are at a Stand,
Some brush at Sea, and something done at Land.

'Tis not the Grandeur of the Birth and Blood,
 Nor Wealth, nor Honour, can make Mortals good;
 Nor do I think, those Men who most pretend,
 To Piety and Justice, for a Self-End;
 But he that doth as he would be done unto,
 He serves his Brother and Creator too.

Some hot Spurs now to Duelling incline,
 And think it hard their Passions to confine;
 So plunge themselves into Unhappiness,
 That when they would, cannot obtain Redress.
 The best Stars oft are Leaden Heel'd to those,
 Who their own Freedom foolishly oppose.

Full Fifty Years and Four, as if by Destiny driven :
Have I been courting the Diamonds of Heaven.
A tedious Time ! but Heaven's Charms are such,
If God give Fifty more, I'll ne'er think much
To spend them thus ——— who would to Heaven go,
Should study Heaven while he lives below.

ACROSTICK

On the *INGENIOUS**George Parker's Ephemeris for 1743.*

Labour well adjusted Calculations doth impart,
 Planets Motion by the Rules of Art;
 Sol and Tellus all their Aspects too,
 represented are at one single View;
 To seek the Man who writ so long as he,
 you seek you may to all Eternity.

Regnant in old Age, in Youth sublime,
 His *Phoenix* sure the greatest in his Time;
 revealing Secrets rare great Operations,
 known Influence of the Planets Stations;
 earthly Bodies all by the Stars are sway'd,
 derived by God, for he their Courses made.

Urania's Darling who doth appear,
 His *Cælestial* Motions for this Year;
 dares Disprove, or else who can deny,
 the mighty Influence of the Starry Sky;
 the Moon, the Stars, created were,
 Signs and Seasons, Scripture proves it clear.

FRANCIS MAPP, *Philomath.*

*Of the Eclipses of the Sun and Moon that will
happen this Year, 1743.*

THere will be fix Eclipses this Year, according to the
Computation of the Ingenious Mr. Leadbetter, viz.
Four of the greater Light the Sun, and Two of the Moon,
in the following Order,

The first is of the Sun, on the 13th Day of *April*, at 47
Minutes after 9 in the Morning: It will not be Visible at
London, but in the more Southern Parts of the World it will
be seen, tho' but small where Visible.

The second is of the Moon, on the 27th Day of *April*, 23
Minutes after 3 in the Afternoon, at which Time the Moon
is below the Horizon, therefore not to be seen at *London*, or
near it.

The third is of the Sun, on the 1st Day of *May*, 55
Minutes after 5 in the Afternoon: It will not be seen by us
at *London*, but the Northern Parts of the World may behold
it.

The fourth is also of the Sun, the 6th Day of *October*, 49
Minutes after 2 in the Afternoon; this is also a Northern E-
clipse and not to be seen with us, or any Part of this Side
Berwick on Tweed.

The fifth is a great Eclipse of the Moon, and if the Air be
clear will be seen at *London*, and by all *Europe*, on *Sunday*
the 22d of *October*, beginning near 2 in the Morning.

The 6th and last is a small Eclipse of the Sun, on the 9th
of *November*, at 6 in the Morning, and Visible only to the
Southern Parts of the World, so that I shall say no more of
it.

A Defence of Judicial ASTROLOGY.

Here lately happen'd to come to my Hand a little Treatise of Mr. *Blagrave's* of *Reading*; Intituled his Astrological Practice of Physick, and giving an Account of the great and extraordinary Cures he had performed by the Efficacy he met withall in gathering of Plants and other Vegetables at select Times and Seasons, which renders them more powerful and virtuous than otherwise: Which brought into my Memory a very eminent Passage, wherein myself was happily concern'd, it tending to confirm his Allegations, and of all ancient Students in the Art of Healing, and ridicule the Novel Whims of the present Ages, wherein that laudable Science of Astrology is so meanly treated and despised: Therefore mind the following Relation.

About the Year 1688, a young Man that was Born in *Worcestershire*, in the same Parish as myself, was sent to *London*, and put Prentice to a Joyner, who I had a peculiar Respect for, because both our Parents had an affectionate Love and Esteem for each other. This young Man having serv'd his Time, and having no Relation in *London*, I invited him to take his Lodging at my House, till he could fit himself better, which he did for a good Space of Time; during this Space of Time, I happen'd to set my Pen at work to compose my Ephemeris, which soon after it became Publick; but I was apply'd to by a near and loving Neighbour, for a Conference with his Wife's Brother, a Reverend Clergyman in *Essex*, whose Request was to give him the Critical Minute when Center'd 8, which I readily comply'd with, and did it Annually for some Years; after some Time I demanded when I should be blest'd with the Produce of the Performance, and was instantly gratified to Content with a Part of it.

A Defence of Judicial ASTOROLGY.

During this, the young Joyner before spoken of, was daily much afflicted with frequent Bleedings at the Nose, which after some Time, became very troublesome to him, and then informed me of it; upon this, I gave him some of my Clergyman's Benevolence to hold in his Hand for a Cure, which was no sooner perform'd, but the Bleeding instantly stopt, and in a few Days after was totally freed thereof. This, if any unbelieving Apostate shall ridicule or deny, an Affidavit shall be made of its Truth when ever requested: Now why might not Mr. Blagrave perform these eminent Cures he mentions, without any Witchcraft or Conjuratation, or indeed any other diabolical Performance whatever. Vale.

Note, That Hackney-Chair-men are oblig'd to the same Distances for Eighteen-pence, which the Coaches perform for 1 s.

And if any Hackney-Coach-man or Chair-man shall refuse to go at, or exact more for Hire than the Rates hereby limited, he shall for every such Offence forfeit 40 s.

Note, The Mile according to Statute, Hen. 7th, is 8 Furlongs, or 5280 Feet. Then if the Step or Pace of a Man in Walking be 5 Foot, 1056 such Paces will be an exact Mile.

Rates of Water-men, as they are set forth by the Lord-Mayor and Aldermen of London.

	Oars	Sculls
From London-Bridge to Lime-house, New-Crane,	1	1
Shadwell-Dock, Bell-Wharf, Ratcliff-Crofs	1	0 6
To Wapping-Dock, Wapping New and Old Stairs,		
the Hermitage, Rotherhith-Church stairs	0	6 0
From St. Olave's to Rotherhith-Church stairs,		
and Rotherhith-stairs	0	6 0
From Billingsgate, St. Olave's, to St. Saviour's Mill	0	6 0
Any Stairs between London-Bridge and Westminster	0	6 0
From either Side above London-Bridge to Lambeth and Vaux-hall	1	0 0
From White-hall to Lambeth and Vaux-hall	0	6 0
From Temple, Dorset, and Black-fryers Stairs		
or Paul's-Wharf, to Lambeth	0	8 0
Over the Water directly between Vaux-hall and Lime-house	0	6 0

The Rates of Oars.

Down the River.

The Hire of the whole Tilt-Boat	22	6

What Water-man takes and demands more than these Rates, is liable to pay 40 s. and suffer half a Year's Imprisonment.

Directions for Passing and Re passing on the Water about London.

Observe, That below Bridge the Water ebbs seven Hours, and flows five.

Above Bridge, it ebbs eight Hours, and flows four, according to the Water-mens Observation, who in their Conversation use these Terms.

When the Water is at lowest, then it is called *Flood*; if rising, it is called *Young or Old Flood*; when it is at highest, and begins to fall, it is called *Ebb Water*.

High Water is the Time at *Billingsgate* for all Passengers that are bound for *Gravesend, Tilbury, Grays, &c.*

If to *Woolwich, Blackwall, Greenwich, &c.* any Time till two, or three Hours after High Water.

A TABLE

A TABLE for finding the hourly Motion of the Moon, and thereby her true Place at any Time of the Day.

The Use of this TABLE is to find (by an *Ephemeris*) the true Place of the Moon at any particular Time of the Day. But first you must know, that all Astronomers begin the Day at Noon, and count 24 Hours to the Day; so that beginning one Day at Noon, the same ends the next Day at Noon; therefore 1 in the Afternoon is the first Hour of the Day, and 13 Hours after Noon is the next Day one in the Morning. Now in the following *Ephemeris*, the Moon's Place in the 3d Column in every Month is exactly calculated to the Meridian of London; and to know her daily Motion, you must subtract the Place of the Moon one Day, from her Place the following Day, by adding 30 Degrees.

TABLE for finding the hourly Motion of the Moon,
and thereby her true Place at any Time of the Day.
